SUMMARY

Computer Engineer driven by a passion for clean code, sustainable software architecture, and building systems that stand the test of time. Through academic, personal, and collaborative projects — including APIs, automation tools, and cloud-integrated applications — I have gained hands-on experience in designing scalable solutions and applying modern software development principles. My leadership and project coordination experience in non-profit organizations has strengthened my skills in team management, problem-solving, and effective communication. Quick to learn and eager to contribute, I leverage these abilities to develop software that is both technically robust and adaptable to evolving needs.

WORK EXPERIENCE

Software Developer Intern

July 2025 - August 2025

Talya Bilişim | Antalya, Türkiye

- Developed and maintained backend services using **Node.js** and **Express** framework.
- Built responsive user interfaces and dynamic web applications with **Angular**.

Frontend Developer Intern

July 2023 - August 2023

Mavi Arge | Antalya, Türkiye

- Created and implemented user interface pages using **Flutter**.
- Utilized **Git** for version control and **Docker** for containerization.

EDUCATION

Bachelor of Science in Computer Engineering

September 2020 - July 2025

Akdeniz University | Antalya, Türkiye

PROJECTS

DoFT – Clean Architecture Task Management API (.NET 8, PostgreSQL, AWS S3)

A modular backend with JWT authentication, role-based access, MediatR-CQRS pattern, Serilog logging, and AWS S3 integration. Dockerized for deployment. Code on [GitHub](#).

LinkHub – URL Shortener API (Node.js, PostgreSQL, Redis)

A containerized Node.js/TypeScript API for URL shortening and QR generation with PostgreSQL, Redis/BullMQ, Google OAuth, and Docker Compose. Code on [GitHub](#).

MoodyApi – Personality-Driven API Middleware for .NET

A lightweight and extensible .NET library that injects mood-based, context-aware messages into API responses. Code on [GitHub](#).

CryptoBot – Automated Trading Bot (Python, React, Binance API)

Automated trading bot using Python and React. Integrates real-time Binance API, custom strategies, backtesting, and smart trade execution. Code on [GitHub](#).

SKILLS

- C# • Java • .NET • Python • JavaScript • Node.js • React • Flutter • SQL • PostgreSQL • Git
 - Docker • Linux • Azure • AWS
-

CERTIFICATIONS AND TRAINING

Red Hat System Administration I (RH124), Red Hat

Completed comprehensive Linux system administration training, including installation, configuration, user/group management, and fundamental networking concepts.

Siber Vatan, BAKA & Akdeniz University

Completed a comprehensive cybersecurity course covering Ethical Hacking, Penetration Testing, Web Security, and Malware Analysis.

VOLUNTEERING AND NGO ACTIVITIES

Head of Antalya Local Council, Civil Life Assosication

September 2022 - November 2023

An NGO focused on youth development, led a team, organized various activities for youth

Support Volunteer, AFAD

August 2022 - Present

Government emergency organization for situations like earthquakes, received extensive training, ready for missions

LANGUAGES

- Turkish (Native)
- English (Fluent)
